JULY—DECEMBER 1966

LONDON:
TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C.4

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XIV. Nos. (127–132)

(EIGHTH SERIES)

NUMBER 127—JULY

PAGE

Metamagnetic Effects in Hematite. By P. J. Flanders, Mullard Research Laboratories, Redhill, Surrey, England. 1

Dislocation Reactions in Body-centred Cubic Structures. By Craig S. Hartley, Department of Physical Metallurgy, University of Birmingham 7

Slip in Explosively Shocked Magnesium Oxide Crystals. By Mark J. Klein and J. W. Edington, Metal Science Group, Battelle Memorial Institute, Columbus Laboratories, Columbus, Ohio, U.S.A. 21

The Epitaxy of Silicon on Alumina—Structural Effects. By R. W. Bicknell, B. A. Joyce, J. H. Neave and G. V. Smith, Allen Clark Research Centre, The Plessey Company Limited, Caswell, Towcester, Northants 31

Vacancy Contribution to the Heat Content in Aluminium. By G. Guarini and G. M. Schiavini, Laboratori CISE, Segrate, Milano, Italy 47

The Annealing of Stacking-fault Tetrahedra in Gold. By R. L. Segall, L. M. Clarebrough and M. H. Loretto, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne 53

Dislocations and Persistent Slip Bands in Fatigued Copper. By E. E. Laufer and W. N. Roberts, Department of Mines and Technical Surveys, Mines Branch, Ottawa, Canada 65

Transmission Electron Microscopy of Synthetic Diamond. By C. Phaal and G. Zuidema, Adamant Research Laboratory, Crown Mines, Johannesburg, South Africa 79

A Mechanism for the Production of Intrusions and Extrusions During Fatigue. By D. F. Watt, Department of Metallurgy and Metallurgical Engineering, McMaster University, Hamilton, Ontario, Canada 89

Temperature Dependence of the Absorption of Fast Electrons in Copper. By M. J. Goringe, Cavendish Laboratory, Cambridge 93

Structure and Energy of Crystal Interfaces. I. Formal Development. By N. H. Fletcher and Peggy L. Adamson, Department of Physics, University of New England, Armidale, N.S.W., Australia 97

Diffraction Contrast from Elastic Shear Strains due to Coherent Phases. By Lee E. Tanner, Ledgemont Laboratory, Kennecott Copper Corporation, Lexington, Massachusetts 02173 111

Thermal Annealing of Lattice Parameter Change in Low-temperature Neutron-irradiated Aluminium. By A. Sepp, U. Himmler, H. Peisl, H. Wenzl and W. Waidelich, I. Physikalisches Institut der Technischen Hochschule Darmstadt, Germany 131

Effects of Vacuum Environment on the Sub-structure of Evaporated F.C.C. Metal Films. By L. E. Murr and M. C. Inman, Department of Engineering Mechanics, Materials Science Laboratory, The Pennsylvania State University, University Park, Pennsylvania 135

b 2

PAGE

The Effect of Weak Bragg Reflected Beams on the Absorption of Electrons. II. By C. R. Hall, Cavendish Laboratory, Cambridge.... 155

Silicon Whisker Growth by the Vapour–Liquid–Solid Process. By P. R. Thornton, D. W. F. James, C. Lewis and A. Bradford, Department of Materials Science, U.C.N.W., Bangor..... 165

The Thermodynamic Calculation of the Debye–Waller Factors of Potassium Bromide and Magnesium Oxide. By B. Yates, Department of Pure and Applied Physics, Royal College of Advanced Technology, Salford 5, Lancs..... 179

Correspondence :

Systematic Errors in Dislocation Densities Measured by Thin Film Electron Microscopy. By C. T. B. Foxon and J. G. Rider, Department of Physics, Battersea College of Technology, London, S.W.11 185

A Field-ion Microscope Study of Neutron Irradiated Iridium. By M. A. Fortes and B. Ralph, Department of Metallurgy, University of Cambridge 189

On the Annealing of Dislocation Loops by Climb. By M. J. Whelan, Metal Physics Group, Cavendish Laboratory, Cambridge, England..... 195

Structure of Zinc Selenide Crystals and Defects Introduced During Growth. By A. G. Fitzgerald, M. Mannami, E. H. Pogson and A. D. Yoffe, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge..... 197

Measurement of Layer Spacing Across Stacking Faults in Cadmium. By A. Howie and B. Jouffrey, Cavendish Laboratory, Cambridge 201

Spectral Analysis of Temperature Fluctuations in Molten Metals. By D. T. J. Hurle, J. Gillman and E. J. Harp, Ministry of Aviation, Royal Radar Establishment, Great Malvern, Worcestershire, England 205

Reviews of Books 211

NUMBER 128—AUGUST

The Effects of Systematic Reflections on Measurements of the Extinction Distance and the Absorption of High Energy Electrons in Crystals. By M. J. Goringe, A. Howie and M. J. Whelan, Metal Physics Group, Cavendish Laboratory, Cambridge, England..... 217

Diffraction Channelling of Fast Electrons and Positrons in Crystals. By A. Howie, Cavendish Laboratory, Cambridge..... 223

Hardening in Quenched Aluminium. By K. H. Westmacott, Research Department, Michelson Laboratory, U.S. Naval Ordnance Test Station, China Lake, California..... 239

The Effects of Dislocation Distribution on the Low Temperature Electrical Transport Properties of Deformed Metals. By Troy W. Barbee, Jr., R. A. Huggins and W. A. Little, Stanford University, California, U.S.A. 255

X-ray Topography of Single Crystal NiO. By Ilan A. Blech and Eugene S. Meieran, Fairchild Semiconductor, Research and Development Laboratory, Palo Alto, California..... 275

PAGE

A Study of Nucleation in Chemically Grown Epitaxial Silicon Films using Molecular Beam Techniques. I. Experimental Methods. By B. A. Joyce and R. R. Bradley, Allen Clark Research Centre, The Plessey Company Limited, Caswell, Towcester, Northants..... 289

A Study of Nucleation in Chemically Grown Epitaxial Silicon Films using Molecular Beam Techniques. II. Initial Growth Behaviour on Clean and Carbon-contaminated Silicon Substrates. By G. R. Booker, Cavendish Laboratory, University of Cambridge, and B. A. Joyce, Allen Clark Research Centre, The Plessey Company, Limited, Caswell, Towcester, Northants..... 301

The Effect of Fast Neutron Irradiation on the C_{33} Elastic Modulus of Highly Oriented Pyrolytic Graphite. By L. Summers, D. C. B. Walker and B. T. Kelly, United Kingdom Atomic Energy Authority, Reactor Materials Laboratory, Culcheth, Nr. Warrington, Lancashire..... 317

The Influence of d-band Structure on Stacking-fault Energy. By I. R. Harris, I. L. Dillamore, R. E. Smallman and B. E. P. Beeston, Department of Physical Metallurgy, University of Birmingham, Birmingham 15 325

Theory of Radiation Embrittlement and Recovery of Radiation Damage in Ferritic Steels. By F. A. Nichols, Westinghouse Electric Corporation, Bettis Atomic Power Laboratory, Pittsburgh, Pennsylvania, U.S.A. 335

The Mechanism of Dimensional Changes in the Crystals of Graphites and Carbons Under Fast Neutron Irradiation. By B. T. Kelly, W. H. Martin, A. M. Price and J. T. Bland, U.K.A.E.A. Reactor Materials Laboratory, Culcheth, Warrington, Lancs..... 343

The Annealing of Faulted Loops, By P. S. Dobson and R. E. Smallman, Department of Physical Metallurgy, University of Birmingham, Birmingham 15..... 357

Localized Moments and Magnetic Couplings in the Theory of Band Magnetism. By P. Lederer and A. Blandin, Faculté des Sciences, Physique des Solides, Orsay (Seine & Oise), France..... 363

The Interpretation of Field-ion Micrographs: The Image from an Order/Disorder Alloy. By H. N. Southworth and B. Ralph, Department of Metallurgy, Cambridge University..... 383

The Compton Line Shape in Cubic Transition Metals. By R. J. Weiss, Materials Research Laboratory, U.S. Army Materials Research Agency, Watertown, Massachusetts..... 403

Correspondence :

Raman Scattering in Uranium Dioxide. By P. G. Marlow and J. P. Russell, Royal Radar Establishment, Malvern, Worcestershire and J. R. Hardy, Theoretical Physics Division, Atomic Energy Research Establishment, Harwell, Berkshire..... 409

Determination of Foil Thickness. By Y. Ishida, Metallurgy Division, National Physical Laboratory, Teddington, Middlesex. 411

Energy of Elliptical Dislocation Loops. By James C. M. Li, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation Research Center, Monroeville, Pennsylvania 15146 and Gaines C. T. Liu, Henry Krumb School of Mines, Columbia University, New York, New York 10027..... 413

Elastic Constants for a H.C.P. Structure Bound by Central Forces. By F. E. Hayes, IBM Development Laboratory, Endicott, New York 415

PAGE

S–N Curves of Copper Single Crystals. By PENTTI KETTUNEN, Department of Mining and Metallurgy, Institute of Technology, Helsinki-Otaniemi, Finland 421
Reviews of Books 427
Book Notices 431

NUMBER 129—SEPTEMBER

The Growth of Interstitial Clusters in Graphite under Irradiation. By A. B. LIDIARD and R. PERRIN, Theoretical Physics Division, Atomic Energy Research Establishment, Harwell 433

Thermoelectric Power and Electrical Resistivity of Cu_3Au Doped with 3d Transition Metals. By G. AIROLDI, M. ASDENTE and M. DROSI, Laboratori C.I.S.E., Segrate, Milano 455

Precipitation at Superlattice Domain Boundaries with Particular Reference to a Copper–Aluminium–Nickel Alloy. By P. R. SWANN, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation Research Center, Monroeville, Pennsylvania, U.S.A. 461

Quenching of Vacancies in Pure Aluminium and in Dilute Aluminium–Indium and Aluminium–Magnesium Alloys. By F. C. DUCKWORTH and J. BURKE, Department of Metallurgy, University of Liverpool 473

The Phase Change of Zinc Sulphide and the Stacking Sequence of a New 66R Polytype. By B. K. DANIELS, Department of Electron Physics, The University of Birmingham, England 487

Diffusion and Conductivity in the $NaCl–ZnCl_2$ System. By S. J. ROTHMAN, L. W. BARR, A. H. ROWE and P. G. SELWOOD, Solid State Physics Division, A.E.R.E., Harwell, Berks 501

The Effect of Stress on Strain Ageing. By E. A. ALMOND and D. HULL, Department of Metallurgy, The University, Liverpool 515

Electron Microscopy and Diffraction of Synthetic Corundum Crystals. II. Dislocations and Grain Boundaries in Impurity-doped Aluminium Oxide. By D. J. BARBER and NANCY J. TIGHE, National Bureau of Standards, Washington, D.C. 531

The Direct Observation of Etch-pits at Dislocations in Molybdenum. By H. L. PREKEL and A. LAWLEY, Franklin Institute Research Laboratories, Philadelphia, Pa. 545

The Growth of Grain Boundary Cavities during High Temperature Fatigue. By R. P. SKELTON, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 563

Growth of Deformation Twins in Zinc Crystals. By MAN HYONG YOO and CHUAN-TSENG WEI, Department of Metallurgy, Mechanics and Materials Science, Michigan State University, East Lansing, Michigan 573

Zeeman Effect of Chlorine Pure Quadrupole Resonance in Mercuric Chloride. By J. RAMAKRISHNA, Physics Department, Andhra University, Waltair, India 589

On the Relation between Diffusion Coefficients and Grain Boundary Energy. By JOSHUA PELLEG, Structure and Materials, National Aeronautical Establishment, National Research Council, Ottawa, Canada 595

Three-layer Defects in Quenched Aluminium. By J. W. EDINGTON and D. R. WEST, Metal Science Group, Battelle Memorial Institute, Columbus Laboratories, Columbus, Ohio 603

PAGE

Transmission Electron-microscopic Studies on Mechanisms for Dipole Formation in MgO. By K. Ogawa, Department of Metallurgy, University of Cambridge 619

The Unique Feature of a Low Angle Boundary in the Cu–Zn Superlattice. By J. V. Rinnovatore and N. Brown, School of Metallurgical Engineering, Laboratory for Research on the Structure of Matter, University of Pennsylvania, Philadelphia, Pennsylvania 629

On the Channelling of Protons in Ionic Solids. By R. S. Nelson, Metallurgy Division, A.E.R.E., Harwell, Berks..... 637

The Interpretation of the Hall Effect in Alloys of Copper and Silver with Group B Metals. By C. M. Hurd, Division of Applied Chemistry, National Research Council, Ottawa, Canada..... 647

Correspondence :

Observation of Inner Field Induced in a Dielectric Film. By S. Yamaguchi, Institute of Physics—Chemistry, Hon-Komagome, Tokyo, Japan..... 653

Reviews of Books 655

NUMBER 130—OCTOBER

The Effect of Deformation on Precipitation of θ' and θ in Al–4% Cu. By D. Driver and P. Barrand, Metallurgy Department, Manchester University 657

The Motion of Flux Lines in Type II Superconductors. By P. Nozières, Cavendish Laboratory, Cambridge, and W. F. Vinen, Department of Physics, University of Birmingham..... 667

The Nature of Deformation Around Pressure Cracks on Diamond. By B. R. Lawn, H. H. Wills Physics Laboratory, University of Bristol, and H. Komatsu, Royal Holloway College, Egham, Surrey..... 689

Self-diffusion and Diffusion of Cobalt in Alpha and Delta-iron. By D. W. James and G. M. Leak, Department of Metallurgy, University of Manchester 701

The Elastic Energies of Elliptical Dislocation Loops. By D. J. Bacon, Theoretical Physics Division, A.E.R.E., Harwell, Didcot, Berks..... 715

On the Shape and Size of the Fracture Zones on Glass Fracture Surfaces. By J. W. Johnson and D. G. Holloway, Physics Department, University of Keele..... 731

The Effect of Interstitial Impurities upon Cross-slip in Iron. By C. L. Formby, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire..... 745

Theory of Size Effects in Electrical Conductivity. By E. Ditlefsen and J. Lothe, Institute of Physics, University of Oslo, Blindern, Norway 759

A Widely Applicable Dislocation Model of Creep. By G. A. Webster, Advanced Materials Research and Development Laboratory, Pratt and Whitney Aircraft, North Haven, Connecticut, U.S.A..... 775

Sodium Self-diffusion and the Isotope Effect. By J. N. Mundy, L. W. Barr and F. A. Smith, Solid State Physics Division, Atomic Energy Research Establishment, Harwell, Didcot, Berkshire..... 785

On Field Evaporation. By D. G. Brandon, Institut Battelle, Centre du Recherche 7, route de Drize, Geneva 803

The Diffusion of Calcium in Magnesium Oxide. By J. Rungis and A. J. Mortlock, Physics Department, Australian National University, Canberra..... 821

PAGE

Energy Dependence of Anisotropy of Defect Production in Electron Irradiated Diamond-type Crystals. I. Experimental Measurements on n and p-type Silicon. By I. N. Haddad and P. C. Banbury, J. J. Thomson Physical Laboratory, University of Reading, Reading, England 829

Energy Dependence of Anisotropy of Defect Production in Electron Irradiated Diamond-type Crystals. II. Theoretical Model. By P. C. Banbury and I. N. Haddad, J. J. Thomson Physical Laboratory, University of Reading, Reading, England 841

Habits of Ice Growth in Supercooled Water and Aqueous Solutions. By W. C. Macklin and B. F. Ryan, Department of Physics, University of Western Australia 847

Extended Dislocations and the Schmid Law of Resolved Shear Stress. By F. R. N. Nabarro, Department of Physics, University of the Witwatersrand, Johannesburg 861

Correspondence :

On the Electronic Structure of Nickel-Vanadium Alloys. By Y. Ebisuzaki and M. O'Keeffe, Department of Chemistry, Arizona State University, Tempe, Arizona 867

Slip Plane of Lithium Chloride and Bromide. By N. H. Macmillan and D. A. Smith, Department of Metallurgy, University of Cambridge 869

An X-ray Diffraction Investigation of Liquid Indium. By B. R. Orton and Susan, P. Smith, Physics Department, Brunel Univesity, Acton, London, W.3 873

Reviews of Books 879

NUMBER 131—NOVEMBER

Magnetic Domain Structure of Thin Uniaxial Crystals. By J. P. Jakubovics, Metal Physics Group, Cavendish Laboratory, Cambridge.. 881

The Temperature Dependence of the Magnetic Domain Structure in Thin Cobalt Crystals. By P. J. Grundy, Cavendish Laboratory, University of Cambridge, England 901

Dislocation Movement Through Random Arrays of Obstacles. By A. J. E. Foreman and M. J. Makin, Metallurgy Division, A.E.R.E., Harwell, Berks 911

Theoretical Strength of Perfect Crystals. By W. R. Tyson, Department of Metallurgy and Materials Science, University of Toronto 925

The Contrast from Twin Boundaries in {111} Films of Silver. By J. G. Allpress and J. V. Sanders, Commonwealth Scientific and Industrial Research Organization, Division of Tribophysics, University of Melbourne, Australia 937

The Limiting Grain Size Dependence of the Strength of a Polycrystalline Aggregate. By R. W. Armstrong, Y. T. Chou, R. M. Fisher and N. Louat, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania 943

The Effect of Pressure on the Resistivity and the Thermoelectric Power of Liquid Mercury–Indium Alloys. By C. C. Bradley, National Physical Laboratory, Teddington, Middlesex 953

PAGE

The Partial Structure Factors of Liquid Cu–Sn. By J. E. Enderby and D. M. North, The Physics Department, The University, Sheffield, and P. A. Egelstaff, Solid State Physics Division, A.E.R.E., Harwell.. 961

The Stacking-fault Energy in the Ag–In Series. By P. C. J. Gallagher and J. Washburn, University of California, Lawrence Radiation Laboratory, Berkeley, California..... 971

The Effect of Point Defects on Absorption of High Energy Electrons Passing Through Crystals. By C. R. Hall, P. B. Hirsch and G. R. Booker, Cavendish Laboratory, Cambridge, England..... 979

Electrical Properties of some Liquid Semiconductors. By J. E. Enderby and L. Walsh, Department of Physics, University of Sheffield 991

Defects in Spinel Crystals Grown by the Verneuil Process. By M. H. Lewis, School of Physics, The University of Warwick, Coventry.. 1003

Fatigue Crack Formation in Bicrystals of Lead. By K. U. Snowden, The Baillieu Laboratory, Metallurgy Department, University of Melbourne, Parkville, Victoria, Australia..... 1019

Multiple Electron Diffraction. Application to Evaporating UO_{2+X}. By K. H. G. Ashbee, H. H. Wills, Physics Laboratory, University of Bristol..... 1031

Measurement of the Thermoelectric Power of Ice by an Induction Method. By J. L. Brownscombe and B. J. Mason, Physics Department, Imperial College, London..... 1037

Isothermal Annealing Studies on Vacancy and Interstitial Loops in Single Crystal Graphite. By J. A. Turnbull and M. S. Stagg, Materials Division, Berkeley Nuclear Laboratories, Central Electricity Generating Board, Berkeley, Glos..... 1049

Correspondence :

Rotation of Etch Pits on (001) Surface of Sodium Chloride. By V. Hari Babu, D. B. Sirdeshmukh and K. G. Bansigir, Physics Department, Osmania University, Hyderabad-7, India..... 1067

Contrast Effects due to Elastic Anisotropy in β-brass. By R. C. Crawford and D. R. Miller, University of Melbourne, Parkville, N.2, Victoria, Australia..... 1071

Anomalous Contrast from an Anti-phase Domain Boundary in Beta-brass. By S. G. Cupschalk and Norman Brown, School of Metallurgical Engineering and Laboratory for Research on the Structure of Matter, University of Pennsylvania, Philadelphia, Pennsylvania 1077

Dislocation Loops in Irradiated Zirconium. By T. D. Gulden and I. M. Bernstein, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire..... 1087

Errata 1092

Reviews of Books 1095

NUMBER 132—DECEMBER

Analysis of the Hall Effect and Resistivity of Noble Metal Alloys. By R. D. Barnard, Department of Pure and Applied Physics, Royal College of Advanced Technology, Salford 5, Lancashire..... 1097

On the Elastic Model for the Deviations from Vegard's Law. By R. Muñoz, Universidad de Chile, Facultad de Ciencias Tísicas y Matematicas, Departamento de Fisica, Santiago, Chile..... 1105

PAGE

Dynamics of Plastic Flow at Constant Stress in NaCl Single Crystals. By F. Agulló-López, División de Física, Junta de Energía Nuclear, Madrid 1115

The Effect of Crystallization Conditions on Radiation-induced Crosslink Formation in Polyethylene. Part VI. Some Effects in the Bulk Material. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, Royal Fort, University of Bristol, Bristol..... 1123

The Origin of Dislocations and Sub-structure Arrangements in Copper Single Crystals. By K. R. Evans, Materials Technology Unit, The Boeing Company, Seattle, Washington, and W. F. Flanagan, General Motors Research Laboratory, Warren, Michigan..... 1131

Local Properties of the Magnetization in the Band Theory of Ferromagnetism. By P. Lederer, Faculté des Sciences, Laboratoire de Physique des Solides, associé au CNRS, 91, Orsay..... 1143

Work Hardening of Dispersion-hardened Crystals. By M. F. Ashby, Gordon McKay Laboratory, Division of Engineering and Applied Physics, Harvard University, Cambridge, Massachusetts 02138..... 1157

The Dissolution of Atoms from Steps on a Metal Surface. By D. Howard and T. Pyle, Chemistry and Metallurgy Department, Lanchester College of Technology, Priory Street, Coventry..... 1179

Temperature Coefficient of Twin Boundary Energy of Platinum and Cobalt. By M. McLean and H. Mykura, Department of Natural Philosophy, Glasgow University..... 1191

X-ray Line Broadening in Explosively Shocked Magnesium Oxide. By M. J. Klein and P. S. Rudman, Metal Science Group, Battelle Memorial Institute, Columbus Laboratories, Columbus, Ohio, U.S.A..... 1199

Twins and Stacking Faults on {310} Planes in Body-centred Cubic Metals. By Craig S. Hartley, Department of Physical Metallurgy and Science of Materials, University of Birmingham, Birmingham 15.... 1207

The Mechanism of Prismatic Dislocation Loop Formation in Cyclically Strained Aluminium. By C. E. Feltner, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan..... 1219

Combined Electron Microscopy and Energy Analysis of an Internally Oxidized Ni+Si Alloy. By S. L. Cundy and P. J. Grundy, Cavendish Laboratory, Cambridge, England..... 1233

Homogeneous Nucleation and the Phenomenon of Crystalloluminescence. By V. A. Garten and R. B. Head, Division of Physical Chemistry, C.S.I.R.O., Chemical Research Laboratories, Melbourne.... 1243

Effect of Field Modulation on Dynamic Nuclear Polarization. By J. Ramakrishna, Clarendon Laboratory, University of Oxford, England 1255

The Effect of Pressurization on Yield by Twinning in Armco Iron. By F. M. C. Besag and F. P. Bullen, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia..... 1259

Some Comments on the Mass Effect in Diffusion. A. D. Le Claire, Solid State Physics Division, Atomic Energy Research Establishment, Harwell, Didcot, Berks..... 1271

The Velocity of a Wave along a Dislocation. By T. Laub and J. D. Eshelby, Cavendish Laboratory, Cambridge, England..... 1285

Correspondence :

Observation of Vacancy Pits at Grain Boundary : Free Surface Intersections. By G. A. Chadwick, Department of Metallurgy, University of Cambridge..... 1295

Diffusion of Gold in Sodium. By L. W. Barr, J. N. Mundy and F. A. Smith, Solid State Physics Division, Atomic Energy Research Establishment, Harwell, Didcot, Berks..... 1299

PAGE

In Support of a Model of Creep Based on Dislocation Dynamics. By G. A. WEBSTER, Advanced Materials Research and Development Laboratory, Pratt and Whitney Aircraft, North Haven, Connecticut 1303

Observations of Two-leaved Spirals in Ruthenium. By S. RANGANATHAN, Inorganic Materials Research Division, Lawrence Radiation Laboratory, Berkeley, California, and A. J. MELMED, National Bureau of Standards, Institute for Materials Research, Metallurgy Division, Washington, D.C. 1309

Reviews of Books 1313
